Potential IMACS Improvements/Enhancements

- Allow multiple adds/updates of line items without exiting dialog box and provide indicator that line item has been saved/added on Line Item Requirements window.

- When first entering window, automatically fill list box with data without selecting "List" button on selected screens. (i.e. Select TAB)

- Provide capability to delete more than one message at a time.

Potential IMACS Improvements/Enhancements

- When adding a TAB, add filter to the list of repair activities so that the user doesn't have to scroll down the entire list
- Add features to windows that reduce the number of mouse clicks (i.e. if it is the only item on the window).
- From the assets menu options, retain the DMISA number when selecting new options.
